## Diagram C77

61'

These etched sides can be built into a complete coach using products from our range as supplied in our full kits. Please refer to the panel opposite. Should you prefer they can also be used for scratchbuilding.

The Sunshine Stock (also known as 'new type') were introduced in 1936 and entered service on premier expresses such as *The Bristolian* and the *Cheltenham Flyer*. Subsequently they were cascaded into general service. The name derived from the large picture windows on the corridor side. They had end vestibules and a mix of corridor window sizes with 4' for 3rd class and 5' for 1st class. Sliding vents were provided in some corridor windows.

1096 was altered to run with two diesel railcars to form a 3-car set.

### Livery

The coaches were painted in chocolate and cream with white roofs and carried the 'shirtbutton' monogram. Droplight frames were in Indian Red (brick red).

The final GWR style appeared from 1943 onwards. The cream panel extended from 7" below the cantrail down to 1½" below the windows. Double lining was applied, the lower waist line being 7" below the upper one. Lining was black and gold, and numbers were in the lining panel at both ends. Roofs were painted grey. The monogram was replaced with the new Coat of Arms in the centre of the panel flanked by the words 'Great' and 'Western'. This was later extended to all coaches built since 1936 which had the double lined waist style.

From 1949 they received BR livery of carmine and cream with gold and black lining. The cream panel was the full height of the windows plus an inch top and bottom. The black line was against the cream. From 1956 they were painted maroon lined gold/black/gold at the waist and black/gold above the windows.
