

M54 LMS STANIER CORRIDOR BRAKE COMPOSITE (BCK) D1932/2010

D1932: 51 built 1935-1936; withdrawn 1963*-1965; 1 preserved 62'
D2010: 20 built 1938; withdrawn 1963-1965; none preserved
 * - 1 withdrawn before 1948

These etched sides can be built into a complete coach using products from our range as supplied in our full kits. Please refer to the panel opposite. Should you prefer they can also be used for scratchbuilding.

The two diagrams were externally identical. The later ones to D2010 had the w.c. positioned differently within the lavatory compartment and had removable tables in the passenger compartments. They formed the largest group of LMS corridor brake composites and were unique as the only LMS coaches built to a 62' length.

Livery

The LMS coach body colour was maroon. Ends were also maroon with the detail picked out in black, but from the end of 1936 they were painted all over black. Simple lining was adopted at the beginning of 1934. In 1946 the yellow was replaced with a much lighter shade referred to as 'straw'. From 1949 coaches received BR crimson and cream. From 1956/7 BR maroon with simple lining was adopted.

Number and lettering styles, insignia and class designation placement did not always follow the changes of livery. For further information on a particular vehicle at a specific date please consult references and photographs.

Coaches left the works with the roof finished in a metallic aluminium paint. However, in service this quickly took on an overall muddy grey colour.

Underframes and bogies were finished in black.
